

# Citizen Advisory Committee (CAC)

What is the CAC? The CAC for this project is a steering committee made up of a sample of residents around the hydraulic canal system as well as representatives from the City Commission, Planning Commission, Parks Board, Utility Board and Tree Committee. It is the first small group discussion, but just one of many more points of engagement during the project, including Focus Group sessions and Community Summits that will be open to the public.

The purpose of the CAC is to provide early feedback to staff so that staff can direct a better informed and more productive public engagement strategy with the Focus Groups and Community Summit meetings. All three forms of public engagement are intended to help the City select design alternatives that most reflect the community's values and needs and comply with State of Ohio Dam safety regulations.

## CAC Members for the Piqua Hydraulic Canal and Dam Safety Design Project

**Jeff Lange**, Middle Great Miami Watershed Alliance and Resident on Swift Run Lake

**Randy Kirchner**, Middle Great Miami Watershed Alliance

**Dan French**, Resident on Echo Lake
